

Step 1: After uploading a PDF, Word, or PowerPoint file, click the link within your content module to open the file. Scroll down the page, past the document, and you will see a button “Open with docReader”. Click that button.

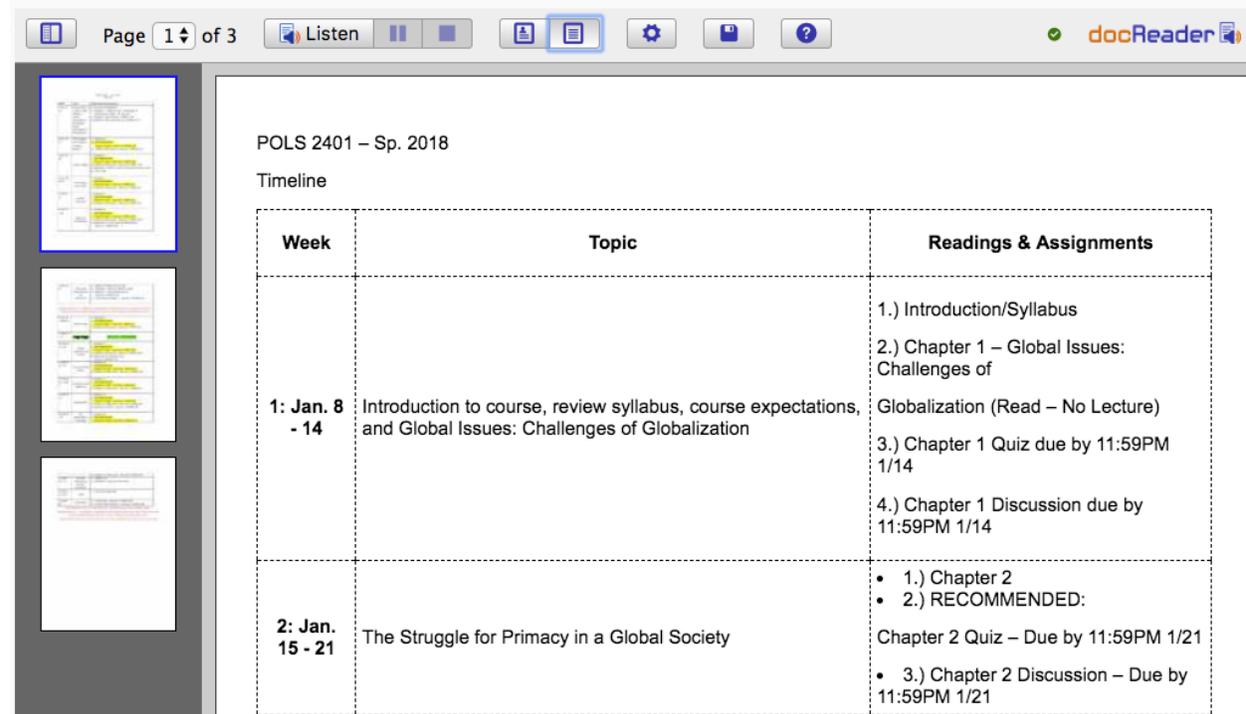

Step 2: ReadSpeaker docReader will open the document and display a toolbar which will allow the following options:

Listen: Clicking “Listen” will read the document aloud.

Text Mode: Clicking text mode will convert the document to text only mode. ReadSpeaker defaults to layout mode which will retain the layout of the document which you originally uploaded.

Settings: Clicking the gear wheel button will open the below menu and allow users to change the reading speed, highlighting color, and text appearance.
