

Clayton State University

Fact Book 2005

Preface

The major purpose of this fact book is document the characteristics of Clayton State University and the factors that cause change in these characteristics, in order to inform strategic and long-range planning efforts. Established in 1969 in a park-like setting 15 minutes from downtown Atlanta, Clayton State University serves the metro Atlanta area as a hub for undergraduate education. After five years of steady enrollment growth, and the fall 2004 opening of the \$19 million University Center, Clayton State currently has more than 6,000 students and is ranked by U.S. News & World Report as having the most diverse student population among comprehensive baccalaureate-level colleges and universities in the Southeastern United States. A national pioneer in “ubiquitous computing” and a leader in on-line and distance education, Clayton State is one of only 36 “Notebook Universities” in the country, and was the third public university to require that each student have access to a notebook computer. Clayton State is the only academic institution in the Southeast with a world-class recital hall (Spivey Hall) on campus. Clayton State is also the only university in the country adjacent to both state and national archives facilities. The University currently offers 29 baccalaureate degree programs with several new programs under development. The University’s Athletics program features 10 sports and competes at the NCAA Division II-level in the Peach Belt Athletic Conference.
