

Institutional Funds American Rescue Plan (ARP)/HEERF III Funding Requests Clayton State University (Spivey Hall)

Department/ Division/ Unit	Request	Reimbursement for expenses	Brief Statement explaining eligibility for HEERF III Funding	Amount Requested	Financial Implications if not funded	Comments
Spivey Hall	Spivey Hall auditorium air quality study	Minor remodeling	Per BOR "Allowable Use" guidance 6/1/21, this request relates to an HVAC system in a previously completed building, "to help with air filtration to prevent the spread of COVID-19." Study would test the effectiveness of recently upgraded air filtration system and air-exchange balancing.	\$ 1,500.00	Due to ongoing concerns about spreading Covid-19 large gatherings in indoor spaces for prolonged periods, at a time when use cannot be mandated, Spivey Hall audience occupancy for Fall 2021 is presently capped at 200 of its 390 seats. A professional air quality assessment by an outside firm could support expansion of occupancy, be promoted to ticket-buyers, enhance the actual and perceived safety of attending Spivey Hall events, and generate more earned income.
